THE INTEGRAL WORLDS APPROACH IN SLOVENIA

Contributing an Integral Economic Perspective to the EU via "Smart Integration"

FROM MDGs to SDGs

Moving towards a more integrated Global Development Agenda

HOWEVER, FURTHER EVOLUTION URGENTLY NEEDED

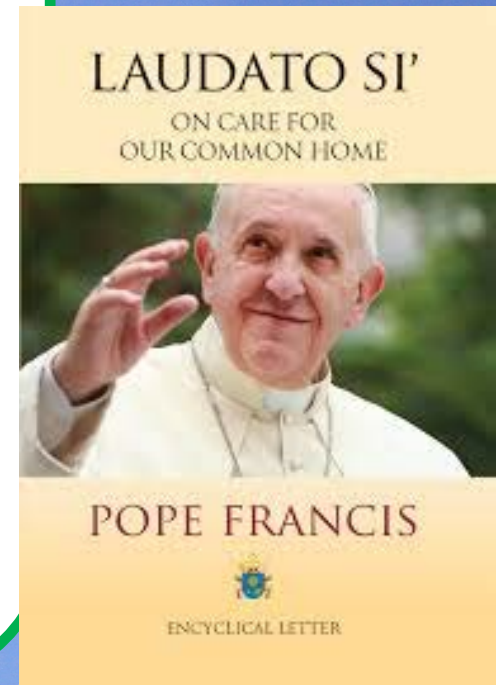

*Not yet an Integrated Perspective
Not yet a “Common Home” Perspective*

“We are faced not with two separate crises, one environmental and the other social, but rather with one complex crisis which is both social and environmental. Strategies for a solution demand an integrated approach to combating poverty, restoring dignity to the excluded, and at the same time protecting nature.”

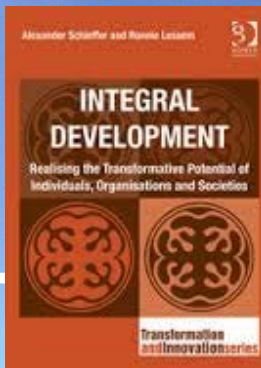

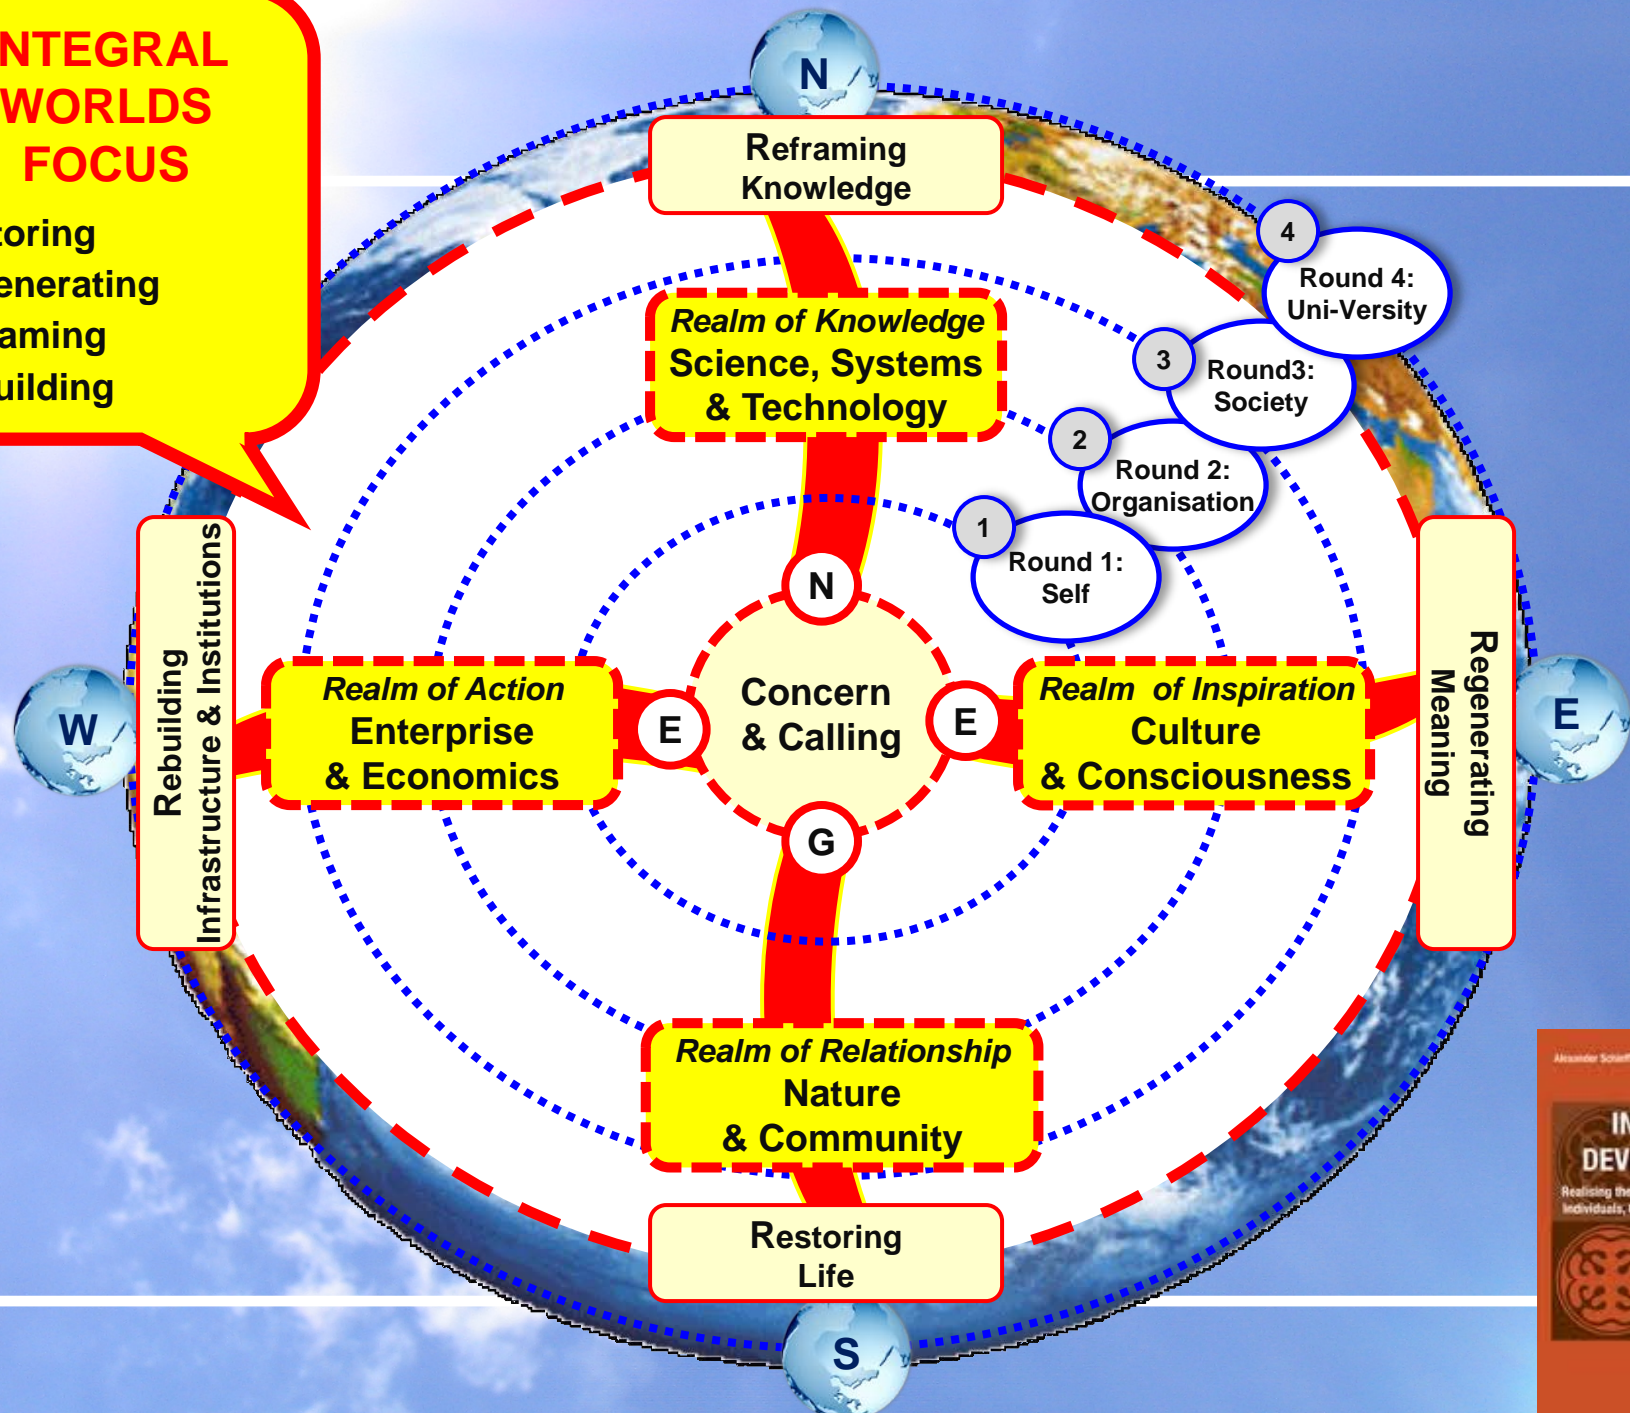

“The urgent challenge to protect our common home includes a concern to bring the whole human family together to seek a sustainable and integral development, for we know that things can change.”

“We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision.”
