Integral Arts College

Integral Arts and Humanities College

The integral college is envisioned to provide a unique educational model for Arab emancipatory arts and humanities, offering holistic programs based on research and innovation, redefining 21st century academia, and aimed at creating knowledge for societal transformation.

“Education is like bread, the issue of producing bread does not only concern the bakers or the consumers but it is in the heart of food security. Within the same logic, we cannot say that education is an issue that concerns educators only, but rather it is an issue that concerns the whole of society because it is highly linked with the economic and intellectual stability of the community and its social cohesion” **(Tarazi, 2017)**.
